

Graphic Design Internship Position

Show us why your graphic design, marketing savvy and work ethic beat the rest!

CS Creative, an award-winning, Dallas-based graphic design and marketing firm, is offering full-time or part-time graphic design internships. These are working internships in a casual environment allowing you to take real experience back to your college courses. Duties include working with senior creative and account services professionals, brainstorming, presenting concepts and production in print and new media. (Okay, there may be some filing too.) If you want to hone your skills and find out what your life might be like post-graduation, this could be the opportunity for you.

Working knowledge of Adobe Creative Suite is required, and interactive experience is a plus. We prefer interns who would be available for full days (approximately 9am - 5pm) at least 2-3 days per week. Please send three - six excellent design samples or your web link along with a polished resume. Sincere and well-prepared applicants may apply to careers@cs-creative.com for our 2010 internships.
